4. How to Use in Unity

- Drag a music track into the Scene
- Unity automatically creates an Audio Source
- Enable **Loop** if required
- Adjust Volume and Audio Mixer settings as needed

Playing via Script

```
using UnityEngine;

public class MusicPlayer : MonoBehaviour
{
    public AudioSource audioSource;

    void Start()
    {
        audioSource.loop = true;
        audioSource.Play();
    }
}
```

5. License & Usage Restrictions (Paid Asset)

You MAY use this asset for:

- Commercial and non-commercial games
- Trailers and promotional videos
- Interactive applications

You may NOT:

- Resell or redistribute the audio files
- Upload tracks as standalone music
- Claim the music as your own creation

Usage follows Unity Asset Store EULA:

<https://unity.com/legal/as-terms>
